IGMA Launches Revamped Website

(Ottawa, Ontario) - The Insulating Glass Manufacturers Alliance (IGMA) recently unveiled its new website, offering enhanced information, online registration for its many technical and educational events, as well as a better overall user experience. The association has been working on features for the new website for the past year, and the launch came in conjunction with the IGMA Summer Technical Conference in late August in Victoria, BC. The enhanced new site is available now at <http://www.igmaonline.org>.

"We're very excited about our new website and the features it brings to our members," said IGMA Executive Director Marg Webb. "Our primary goal with the new site was to be able to better organize the information we offer on the website, as well as increase the usability of our site for our members and to the rest of the industry."

One of the new features of the website is the Technical Corner, which offers the latest technical presentations from IGMA, including video presentations on glass handling safety, a full archive of the "SIGMA-grams" offered by the former Sealed Insulating Glass Manufacturers Association (SIGMA), a predecessor of IGMA that merged with the Insulating Glass Manufacturers Association of Canada (IGMAC) to form IGMA. The latest Technical Bulletins from IGMA are in the Technical Corner, as well as a new feature named Bill's Technical Corner, which features technical articles and commentary from Bill Lingnell, PE, the IGMA Technical Consultant and a legend in the glass and glazing industry.

"Even though our Technical Corner just launched with the new site, it already is a treasure trove of technical information free for the industry to download and use," said Webb. "In the next months, our goal is to continue to add top notch technical information to the Technical Corner, as well as to provide even more great features on the website. Our Members Only section will launch at the end of the year, and the interactive tools on that site will add an even better experience for our members looking to make a difference in the industry."

IGMA also offers registration online for its upcoming IGMA Performance and Innovations Educational Conference, held December 7-8th in Vancouver, BC. To learn more about that conference and register online, as well as to view the new features and offerings on the new website, visit today at www.igmaonline.org.

###

IGMA is the trade association representing the interests of the industry not only in North America but worldwide. Our focus is on developing and advancing new technologies in the manufacture of insulating glass units through the development of codes and standards, topic industry publications, education, product certification and leading edge research.
